

Xpressions™ offers style, variety, and simplicity

It doesn't get much easier than this – the tension fabric printed graphics stay on the frame and the frame snaps together in just a few seconds with a magnetic connection. You're exhibiting in no time and when it's time to change graphics – choose a whole new look or just swap out sections as needed.

Style – your choice of either black or aluminum colored frames. **Variety** – while we have selected the most popular versions, there are at least a half dozen more variations in each frame size – ask to see more examples. **Ease of use** – the frames are strong yet lightweight and assemble with no other tools or parts.

1 x 3 Xpressions "A"
